Subject: Microsoft Settlement

In reference to Mr. Gates Problem: I think the Federal Government went too far in regards to Microsoft! I have heard all my life - build a better mouse trap and people will run to your door. I believe Mr. Gates built this mouse trap!! The Federal Government should back off Microsoft!! Case in Point: Banks are getting together and making a great big bank- This could be very bad for the taxpayers if they fail. However the Government is doing nothing about these mergers. I believe Mr. Gates forfilled the American dream and The American Government should get out of his face. I do not believe there was any wrong doings--so there should be nothing to settle.
